REPORT

REPORT OF THE BIRTHS, DEATHS, AND MARRIAGES REGISTERED IN SCOTLAND DURING THE QUARTER ENDING 31ST MARCH 1933.

The four main Tables comprised in the Return may be summarised as follows :—

Table I shows for the counties and the large burghs of Scotland the number of births (with distinction as to legitimacy), marriages and deaths (those from the principal epidemic diseases and of infants under one year being shown separately), together with the corresponding rates per 1,000 population.

Table II shows for Scotland the numbers and rates per 1,000 population of births, marriages and deaths for each quarter and for the whole year in each of the last ten years. Illegitimate births and deaths under one year are shown separately.

Table III shows in detail the causes of death according to the Detailed International List (adapted) in certain age groups and by sex in Scotland.

Table IV shows in Short List form the causes of death and, for all causes, the ages at death in the counties and large burghs of Scotland.

Births.—The 21,787 births in the present quarter are 134 more than in the preceding quarter, the rate per 1,000 population, 18·0, being 0·3 above that recorded for the previous quarter. Compared with the standard* the number of births and the rate per 1,000 population in the present quarter are 1,816 and 1·6 respectively below that average.

The birth-rate in the aggregate of large burghs, 18·6, is higher than in the rest of Scotland (17·2). In individual areas the rates ranged in burghs from 24·8 in Port Glasgow, 23·3 in Hamilton, and 22·5 in Airdrie, to 12·7 in Rutherglen, 14·0 in Inverness, and 15·3 in Edinburgh. In counties, exclusive of large burghs, it ranged from 20·8 in Lanark, 19·4 in Aberdeen, 19·4 in East Lothian, and 19·4 in Kirkcudbright, to 10·2 in Peebles, 10·7 in Zetland, and 10·9 in Bute.

The proportion of illegitimate births, 6·7 per cent., is 0·4 below that for the previous quarter, and 0·7 below the standard for this quarter of the year.

Of the 21,787 births registered 11,233 were of male children, and 10,554 of female children. Those registered in January numbered 7,243,

* The standard adopted for comparative purposes is the average of the same number and rate for the corresponding quarters of the five preceding years.

in February 6,741, and in March 7,803, the equivalent monthly birth-rates being 17·3, 17·9 and 18·7 respectively.

Marriages.—The number of marriages registered, 7,054, is 1,208 below that for the previous quarter, the rate per 1,000 population, 5·8, being 0·9 below. The number for the present quarter is 181 less than the average, while the rate is 0·2 below.

The rate in the aggregate of large burghs is 6·8 compared with 4·7 for the rest of Scotland. In individual areas the rate in the large burghs ranged from 9·2 in Inverness, 8·9 in Kirkcaldy, and 8·6 in Rutherglen, to 2·9 in Port Glasgow, 3·4 in Arbroath, and 4·0 in Dumbarton. In counties, exclusive of large burghs, it ranged from 6·0 in Midlothian, 5·9 in Lanark, and 5·8 in Clackmannan, to 2·1 in Sutherland, 3·0 in Berwick, and 3·0 in Perth.

Marriages registered in January numbered 3,367, in February 1,887, and in March 1,800, the equivalent monthly marriage-rates being 8·1, 5·0 and 4·3 respectively.

Deaths.*—Deaths registered during the quarter numbered 20,750 and equalled a rate of 17·1 per 1,000 population. They are 3,938 more than were registered in the previous quarter, while the rate is 3·4 more. The number and the rate per 1,000 are 180 and 0·3 respectively below the standard for the first quarter.

The death-rate in the aggregate of large burghs is 17·3 compared with 16·9 for the rest of Scotland. The rates in individual large burghs ranged from 22·3 in Dundee, 21·6 in Dumfries, and 20·9 in Perth, to 11·8 in Clydebank, 13·4 in Dumbarton, and 13·4 in Hamilton. In counties, exclusive of large burghs, it ranged from 23·5 in Kinross, 23·0 in Kirkcudbright, and 22·5 in Bute, to 13·1 in Midlothian, 13·9 in Renfrew, 14·1 in East Lothian, and 14·1 in Peebles.

Deaths registered in January numbered 8,296, in February 6,659, and in March 5,795, the equivalent monthly death-rates being 19·9, 17·7 and 13·9 respectively.

Infant Mortality.—Deaths of children aged under one year numbered 2,358 and are equivalent to an infantile mortality rate of 108 per 1,000 registered live births. These deaths are 463 more than in the previous quarter, and the rate is 20 more. Compared with the standard for the first quarter the rate is 6 less.

This death-rate for the large burghs was 116, while for the rest of Scotland it was 99. In the large burghs individually it ranged from 165 in Coatbridge, 161 in Dumbarton, 140 in Dundee, and 140 in Greenock, to 43 in Arbroath, 55 in Stirling, and 73 in Dunfermline. In counties, exclusive of large burghs, it ranged from 144 in Roxburgh, 143 in Wigtown, and 138 in Dumbarton, to 18 in Zetland, 52 in Berwick, and 57 in Moray.

* *Note.*—Where the place of death differs from the place of usual residence of the deceased, such death, for the purpose of these statistics, is allocated to the place of usual residence if in Scotland.

Causes of Death.—Principal Epidemic Diseases.—Of the 20,750 deaths registered during the quarter, 2,432 or 11·7 per cent. were attributed to the principal epidemic diseases. These deaths include 17 from measles, 85 from scarlet fever, 356 from whooping-cough, 89 from diphtheria, 1,689 from influenza, 95 from cerebro-spinal fever, and 101 others. Compared with the previous quarter the main feature in this group of diseases is an increase in all those specified with the exception of diphtheria, the largest being from influenza, in which the increase was 1,135, and from whooping-cough, in which it was 218. The death-rate from the entire group of epidemic diseases is 201 per 100,000 of population, the highest rates being found in the burghs of Coatbridge (3·3 per 1,000), in Perth (3·1), and in Dundee (3·0), and for counties, exclusive of large burghs, in Dumfries (3·6), in Berwick (3·2), in Fife (3·0), and in Ross and Cromarty (3·0).

Tuberculosis.—Deaths from all forms of tuberculosis, 1,173, account for 5·7 per cent. of all deaths, and are 259 more than in the previous quarter. Of them 896 were ascribed to tuberculosis of the respiratory system, an increase of 203 compared with the previous quarter, 108 to tuberculosis of the central nervous system, an increase of 30, 55 to abdominal tuberculosis, an increase of 6, and 114 to other forms of tubercle, an increase of 20. The quarterly death-rate from all forms of tuberculosis is 97 per 100,000 compared with an average of 103 for the same quarter in the preceding five years, that from respiratory tuberculosis being 74 compared with the average of 75.

Malignant Disease.—Deaths from this cause numbered 1,804, account for 8·7 per cent. of the total deaths, and equal a rate of 149 per 100,000. These deaths are 82 fewer than in the previous quarter, while the rate is the same as the average.

Respiratory Diseases.—Deaths from the principal diseases of the respiratory system, pneumonia and bronchitis, show an increase in numbers compared with the previous quarter, pneumonia being 426 more, and bronchitis 599 more. Pneumonia was responsible for 9·2 per cent. of the total deaths, and bronchitis for 7·7 per cent. Corresponding death-rates per 100,000 population are 157 and 132 respectively. The standard rates for the first quarter are 202 and 145 respectively, but if the rates prevailing in 1929, when influenza was epidemic, be omitted, the standard rates would be 175 for pneumonia and 122 for bronchitis.

Pregnancy and Childbirth.—Deaths of mothers from diseases and accidents of pregnancy and childbirth numbered 139 and are equal to a rate of 638 per 100,000 births. This rate is 114 below the standard for the preceding five years.

Violence.—Deaths from violence numbered 631, account for 3·0 per cent. of all deaths, and are equivalent to a rate of 52 per 100,000. These deaths are 89 fewer than in the previous quarter. Of the total deaths assigned to this group 110 were attributed to accidents with motor vehicles, which is 80 fewer than were recorded in the previous quarter. The death-rate from violence is 9 lower than the standard for this period.

For comparative purposes the accompanying table is given showing the death-rates from several important causes in the present quarter, and the average rate for the first quarter of the previous five years. Compared with the average, mortality for the period under review is higher in each of the principal epidemic diseases except measles and diphtheria, those showing the greatest increases being influenza, scarlet fever, and whooping-cough. Decreases have to be recorded for the principal respiratory diseases pneumonia and bronchitis, and for the tuberculosis group. The death-rate from malignant disease equals the average, but that from deaths associated with pregnancy and childbirth is lower.

The general death-rate is lower than the average, the latter being somewhat weighted by the influenza epidemic of 1929.

CAUSES OF DEATH.	Death-rates per 100,000 population.

REPORT

REPORT OF THE BIRTHS, DEATHS, AND MARRIAGES REGISTERED IN SCOTLAND DURING THE QUARTER ENDING 30TH JUNE 1933.

The four main Tables comprised in the Return may be summarised as follows :—

Table I shows for the counties and the large burghs of Scotland the number of births (with distinction as to legitimacy), marriages and deaths (those from the principal epidemic diseases and of infants under one year being shown separately), together with the corresponding rates per 1,000 population.

Table II shows for Scotland the numbers and rates per 1,000 population of births, marriages and deaths for each quarter and for the whole year in each of the last ten years. Illegitimate births and deaths under one year are shown separately.

Table III shows in detail the causes of death according to the Detailed International List (adapted) in certain age groups and by sex in Scotland.

Table IV shows in Short List form the causes of death and, for all causes, the ages at death in the counties and large burghs of Scotland.

Births.—The 23,212 births in the present quarter are 1,425 more than in the preceding quarter, the rate per 1,000 population, 18·9, being 0·9 above that recorded for the previous quarter. Compared with the standard * the number of births and the rate per 1,000 population in the present quarter are 1,448 and 1·5 respectively below that average.

The birth-rate in the aggregate of large burghs, 19·7, is higher than in the rest of Scotland (18·0). In individual areas the rates ranged in burghs from 24·3 in Coatbridge, 24·2 in Greenock, 24·2 in Hamilton, and 24·2 in Airdrie, to 14·4 in Rutherglen, 14·7 in Arbroath, and 16·1 in Edinburgh. In counties, exclusive of large burghs, it ranged from 21·3 in Lanark, 20·7 in West Lothian, and 20·4 in Aberdeen, to 10·5 in Selkirk, 11·8 in Peebles, and 12·3 in Berwick.

The proportion of illegitimate births, 7·0 per cent., is 0·3 above that for the previous quarter, but 0·4 below the standard for this quarter of the year.

Of the 23,212 births registered, 11,949 were of male children and 11,263 of female children. Those registered in April numbered 7,482,

* The standard adopted for comparative purposes is the average of the same number and rate for the corresponding quarters of the five preceding years.

in May 8,075, and in June 7,655, the equivalent monthly birth-rates being 18·5, 19·3 and 18·9 respectively.

Marriages.—The number of marriages registered, 8,176, is 1,122 above that for the previous quarter, the rate per 1,000 population, 6·7, being 0·9 above. The number for the present quarter is 107 more than the average, while the rate is the same as the average.

The rate in the aggregate of large burghs is 7·7 compared with 5·4 for the rest of Scotland. In individual areas the rate in the large burghs ranged from 11·2 in Port Glasgow, 10·1 in Dumfries, and 10·0 in Dunfermline, to 4·4 in Dumbarton, 5·8 in Paisley, and 5·8 in Coatbridge. In counties, exclusive of large burghs, it ranged from 8·3 in Nairn, 8·1 in Berwick, and 8·0 in Roxburgh, to 2·2 in Inverness, 2·6 in Ross and Cromarty, and 2·6 in Sutherland.

Marriages registered in April numbered 2,877, in May 1,526, and in June 3,773, the equivalent monthly marriage-rates being 7·1, 3·7 and 9·3 respectively.

Deaths.*—Deaths registered during the quarter numbered 15,121, and equalled a rate of 12·3 per 1,000 population. They are 5,629 less than were registered in the previous quarter, while the rate is 4·8 less. The number and the rate per 1,000 are 1,014 and 1·0 respectively below the standard for the second quarter.

The death-rate in the aggregate of large burghs is 12·3 compared with 12·4 for the rest of Scotland. The rate in individual large burghs ranged from 16·0 in Greenock, 14·8 in Port Glasgow, and 14·4 in Falkirk, to 10·1 in Clydebank, 10·5 in Kirkcaldy, and 10·7 in Airdrie. In counties, exclusive of large burghs, it ranged from 18·4 in Zetland, 16·4 in Moray, and 16·2 in Sutherland, to 10·8 in West Lothian, 10·9 in East Lothian, 11·1 in Lanark, and 11·1 in Ayr.

Deaths registered in April numbered 4,991, in May 5,362, and in June 4,768, the equivalent monthly death-rates being 12·4, 12·8 and 11·8 respectively.

Infant Mortality.—Deaths of children aged under one year numbered 1,704 and are equivalent to an infantile mortality rate of 73 per 1,000 registered live births. These deaths are 654 fewer than in the previous quarter, and the rate is 35 less. Compared with the standard for the second quarter the rate is 5 less.

This death-rate for the large burghs was 78, while for the rest of Scotland it was 67. In the large burghs individually it ranged from 156 in Airdrie, 121 in Greenock, and 118 in Rutherglen, to 34 in Inverness, 38 in Stirling, and 39 in Dunfermline. In counties, exclusive of large burghs, it ranged from 163 in Peebles, 88 in Wigtown, and 87 in Angus, to 0 in Kinross, 34 in Bute, 34 in Kirkcudbright, and 34 in Sutherland.

* *Note.*—Where the place of death differs from the place of usual residence of the deceased, such death, for the purpose of these statistics, is allocated to the place of usual residence if in Scotland.

Causes of Death.—*Principal Epidemic Diseases.*—Of the 15,121 deaths registered during the quarter, 666 or 4·4 per cent. were attributed to the principal epidemic diseases. These deaths include 13 from measles, 52 from scarlet fever, 251 from whooping-cough, 76 from diphtheria, 135 from influenza, 56 from cerebro-spinal fever, and 83 others. Compared with the previous quarter the main feature in this group of diseases is a decrease in each of those specified, influenza being 1,554 fewer, whooping-cough 105 fewer, cerebro-spinal fever 39 fewer, scarlet fever 33 fewer, other epidemic diseases 18 fewer, diphtheria 13 fewer, and measles 4 fewer. The death-rate from the entire group of epidemic diseases is 54 per 100,000 of population, the highest rates being found in the burghs of Port Glasgow (2·4 per 1,000), in Greenock (1·5), and in Airdrie (1·1). In counties, exclusive of large burghs, the highest rates were 0·8 in Moray, 0·7 in Lanark, and 0·7 in Zetland.

Tuberculosis.—Deaths from all forms of tuberculosis, 1,043, account for 6·9 per cent. of all deaths, and are 130 fewer than in the previous quarter. Of them 768 were ascribed to tuberculosis of the respiratory system, a decrease of 128 compared with the previous quarter, 107 to tuberculosis of the central nervous system, a decrease of 1, 57 to abdominal tuberculosis, an increase of 2, and 111 to other forms of tubercle, a decrease of 3. The quarterly death-rate from all forms of tuberculosis is 85 per 100,000 compared with an average of 101 for the same quarter in the preceding five years, that from respiratory tuberculosis being 63 compared with the average of 70.

Malignant Disease.—Deaths from this cause numbered 1,862, account for 12·3 per cent. of the total deaths, and equal a rate of 152 per 100,000. These deaths are 58 more than in the previous quarter, while the rate is 9 above the average.

Respiratory Diseases.—Deaths from the principal diseases of the respiratory system, pneumonia and bronchitis, show a decrease in numbers compared with the previous quarter, pneumonia being 938 fewer and bronchitis 1,016 fewer. Pneumonia was responsible for 6·4 per cent. of the total deaths, and bronchitis for 3·8 per cent. Corresponding death-rates per 100,000 population are 79 and 47 respectively. The standard rates for the second quarter are 109 and 64 respectively.

Pregnancy and Childbirth.—Deaths of mothers from diseases and accidents of pregnancy and childbirth numbered 130 and are equal to a rate of 560 per 100,000 births. This rate is 22 below the standard for the preceding five years.

Violence.—Deaths from violence numbered 723, account for 4·8 per cent. of all deaths, and are equivalent to a rate of 59 per 100,000. These deaths are 92 more than in the previous quarter. Of the total deaths assigned to this group 161 were attributed to accidents with motor vehicles, which is 51 more than were recorded in the previous quarter. The death-rate from violence is the same as the standard for this period.

For comparative purposes the accompanying table is given showing the death-rates from several important causes in the present quarter,

and the average rate for the second quarter of the previous five years. Compared with the average, mortality for the period under review has been more favourable in the group of epidemic diseases, the only exception being a slight increase in the rate from scarlet fever. An improvement is also recorded in the rates from tuberculosis, from diseases of the respiratory system, and from diseases and accidents associated with pregnancy and childbirth. Deaths from malignant diseases continue to show an upward tendency, while there is also a slight increase in the rate from accidents attributed to motor vehicles. The general death-rate, on the other hand, is appreciably lower than the average for this period.

CAUSES OF DEATH.	Death-rates per 100,000 population.

82 (a) Cerebral hæmorrhage, Apoplexy	1131	497	634	...	1	...	2	3	5	16	82	229	439	300	54
(b) 1. Cerebral embolism	86	34	52	9	9	24	25	18	1
2. Cerebral thrombosis	289	138	151	1	1	...	1	1	12	36	116	98	23
3. Cerebral softening	45	19	26	1	1	2	6	13	21	1
(c) 1. Hemiplegia	107	46	61	1	1	5	15	45	33	7
2. Other paralyzes of unstated origin	19	8	11	2	...	1	1	2	7	5	1
83 General paralysis of insane	35	25	10	1	...	3	10	10	7	4
84 Other forms of insanity	22	4	18	2	5	6	4	1	4
85 Epilepsy	38	18	20	2	1	8	6	7	4	4	6
86 Infantile convulsions (age under 5)	72	41	31	60	12
87 (a) Chorea
(b) Neuritis	4	1	3	1	1	1	1	...
(c) Paralysis agitans	18	9	9	1	6	6	4	1
(d) Disseminated sclerosis	33	18	15	1	2	3	10	15	2
(e) Other dis. of nervous system	47	19	28	3	...	5	...	2	1	5	3	6	14	4	4
88 Diseases of eye and annexa	1	1	1
89 (a) Otitis, Diseases of ear	24	11	13	1	3	5	1	5	4	2	3
(b) Mastoid disease	16	10	6	3	2	3	...	3	4	...	1
VII. DISEASES OF CIRCULATORY SYSTEM.															
90 Pericarditis	6	2	4	2	...	2	1	...	1
91 Acute endocarditis	35	17	18	...	2	1	5	5	9	4	5	2	1	...	1
92 Chronic endocarditis, Valvular dis.	648	290	358	...	2	2	8	27	42	46	60	140	192	112	17
93 (a) Acute myocarditis	60	33	27	1	...	3	2	10	8	23	12	1
(b) 1. Fatty heart	52	22	30	3	3	21	17	7	1
2. Cardiovascular degeneration	140	81	59	1	12	45	67	15
3. Chronic myocarditis, other myocardial disease	533	242	291	1	3	11	14	74	184	205	41
(c) Myocarditis not specified as acute or chronic	508	238	270	2	2	2	13	31	89	173	160	36
94 Diseases of coronary arteries, Angina pectoris	256	167	89	1	7	33	75	106	32	2
95 Other diseases of heart	256	120	136	1	...	1	7	10	23	52	87	70	5
96 Aneurysm (heart excepted)	38	29	9	3	...	11	13	5	6	...
97 Arterio-sclerosis (coron. art. except.)	215	114	101	5	25	73	83	29
98 (a) Senile gangrene	79	42	37	1	28	39	11
(b) Other gangrene	9	7	2	7	...	2	...
99 Other diseases of arteries	13	6	7	1	1	...	1	2	1	3	3	1
00 Diseases of veins	17	6	11	2	1	4	5	4	1	...
01 Diseases of lymphatic system
02 Abnormalities of blood pressure	10	5	5	1	1	2	4	2	...
03 Other dis. of circulatory system
VIII. DISEASES OF RESPIRATORY SYSTEM.															
04 Dis. of nasal fossæ and annexa	2	2	1	1
05 (1) Laryngismus stridulus	2	2	...	2
(2) Laryngitis (including croup)	8	5	3	2	3	1	1	1
(3) Other diseases of larynx
06 Bronchitis	579	312	267	37	11	...	2	4	7	8	29	89	162	179	51
07 Broncho-pneumonia	470	250	220	193	97	8	2	7	7	15	27	32	42	29	11
08 Lobar pneumonia	319	218	101	21	20	10	1	24	24	42	53	60	43	18	3
09 Pneumonia (not otherwise defined)	176	114	62	21	20	3	6	9	5	10	22	21	35	21	3
10 Pleurisy	44	29	15	...	7	5	5	5	4	4	4	7	3
11 (1) Congestion of lungs	98	37	61	9	1	1	1	2	7	4	21	36	16
(2) Embolism, Thrombosis, Infarct	3	1	2	2	...	1
12 Asthma	13	6	7	3	3	5	2	...
13 Pulmonary emphysema
14 (a) Chronic interstitial pneumonia	16	13	3	2	3	7	4
(b) 1. Gangrene of lung	4	2	2	1	1	1	1
2. Other diseases of respira- tory system	6	2	4	...	1	1	3	1

IX. DISEASES OF DIGESTIVE SYSTEM.																				
115	(1) Diseases of teeth and gums	7	4	3	3	...	1	1	...	1	...	1	1		
	(2) Diseases of tonsils	25	7	18	1	3	4	2	...	3	2	3	3	4		
	(3) Other diseases of buccal cavity or pharynx	18	6	12	2	2	...	1	1	1	2	2	2	3		
116	Diseases of oesophagus		
117	(a) Ulcer of stomach	71	48	23	1	4	9	14	21	16	5		
	(b) Ulcer of duodenum	68	53	15	1	2	8	9	13	19	11	5		
118	Other diseases of stomach	57	26	31	6	1	2	3	2	14	15	11		
119	Diarrhoea and enteritis (under 2 years)	155	92	63	142	13		
120	(a) Diarrhoea and enteritis (over 2 years)	47	17	30	...	8	5	1	2	1	...	4	4	11	8		
	(b) Ulceration of intestines	14	6	8	1	1	2	2	1	4	2	1		
121	Appendicitis	111	72	39	...	2	8	13	17	10	14	14	18	12	3		
122	(a) Hernia	53	21	32	4	2	2	3	5	8	16	12		
	(b) Intestinal obstruction	59	38	21	8	2	2	2	5	3	3	1	13	13	5		
123	Other diseases of intestines	34	17	17	2	...	1	1	2	2	3	6	5	7	5		
124	Cirrhosis of liver	31	21	10	2	...	3	4	7	10	4		
125	(1) Acute yellow atrophy of liver	4	4	2	2		
	(2) Other diseases of liver	8	4	4	2	1	1	2	1	1		
126	Biliary calculi	37	9	28	5	3	9	15	4		
127	(1) Cholecystitis	57	9	48	1	2	6	16	20	11		
	(2) Other diseases of gall bladder and ducts	5	1	4	1	1	...	1	2		
128	Diseases of pancreas	8	4	4	1	...	4	2	1		
129	Peritonitis without stated cause	26	9	17	3	2	3	3	1	3	2	1	3	4	1		
X. NON-VENEREAL DISEASES OF GENITO-URINARY SYSTEM.																				
130	Acute nephritis	69	30	39	3	6	5	2	2	8	10	8	15	7	3		
131	Chronic nephritis	266	134	132	2	5	13	23	44	66	75	32		
132	Nephritis unspecified	89	47	42	1	2	3	7	9	23	30	11		
133	Other dis. of kidney and annexa	39	11	28	3	1	1	...	3	2	2	7	7	5	7		
134	Calculi of urinary passages	15	10	5	1	3	3	2	4	2		
135	Diseases of bladder	41	23	18	2	1	3	12	18		
136	Dis. of urethra, urinary abscess, &c.	15	12	3	5	2	5	3		
137	Diseases of prostate	93	93	3	15	32	37		
138	Diseases of male genital organs		
139	(a) Diseases of ovary, fallopian tube and parametrium	13	...	13	...	1	1	5	2	1	3		
	(b) Diseases of uterus	10	...	10	4	1	3	...	2		
	(c) Diseases of breast	1	...	1	1		
	(d) Other diseases of female genital organs	2	...	2	1	...	1		
XI. DISEASES OF PREGNANCY AND CHILDBIRTH.																				
140	Post-abortion sepsis	9	...	9	3	3	3		
141	Abortion not returned as septic	1	...	1	1		
142	Ectopic gestation	1	...	1	1		
143	Other accidents of pregnancy		
144	(a) Placenta prævia	7	...	7	1	2	4		
	(b) 1. Accidental hæmorrhage	10	...	10	3	7		
	2. Oth. puerperal hæmorrhage	8	...	8	1	5	2		
145	Puerperal sepsis	43	...	43	9	26	6	2		
146	Puerperal albuminuria, Convulsions	23	...	23	4	10	9		
147	(1) Uncontrollable vomiting	6	...	6	1	5		
	(2) Other toxæmias of pregnancy	1	...	1	1		
148	Puerperal phlegmasia alba dolens, Embolism	6	...	6	1	3	2		
149	Other accidents of childbirth	13	...	13	3	9	1		
150	Other or unspecified conditions of the puerperal state	2	...	2	1	1

REPORT

REPORT OF THE BIRTHS, DEATHS, AND MARRIAGES REGISTERED IN SCOTLAND DURING THE QUARTER ENDING 30TH SEPTEMBER 1933.

The four main Tables comprised in the Return may be summarised as follows :—

Table I shows for the counties and the large burghs of Scotland the number of births (with distinction as to legitimacy), marriages and deaths (those from the principal epidemic diseases and of infants under one year being shown separately), together with the corresponding rates per 1,000 population.

Table II shows for Scotland the numbers and rates per 1,000 population of births, marriages and deaths for each quarter and for the whole year in each of the last ten years. Illegitimate births and deaths under one year are shown separately.

Table III shows in detail the causes of death according to the Detailed International List (adapted) in certain age groups and by sex in Scotland.

Table IV shows in Short List form the causes of death and, for all causes, the ages at death in the counties and large burghs of Scotland.

Births.—The 21,136 births in the present quarter are 2,076 less than in the preceding quarter, the rate per 1,000 population, 17·1, being 1·8 below that recorded for the previous quarter. Compared with the standard * the number of births and the rate per 1,000 population in the present quarter are 1,693 and 1·6 respectively below that average.

The birth-rate in the aggregate of large burghs, 17·4, is higher than in the rest of Scotland (16·7). In individual areas the rates ranged in burghs from 24·9 in Port-Glasgow, 22·6 in Coatbridge, and 22·2 in Airdrie, to 11·6 in Perth, 11·9 in Rutherglen, and 13·8 in Arbroath. In counties, exclusive of large burghs, it ranged from 20·9 in Wigtown, 20·7 in East Lothian, and 20·2 in Aberdeen, to 10·1 in Selkirk, 12·6 in Bute, 13·3 in Argyll, and 13·3 in Berwick.

The proportion of illegitimate births, 6·9 per cent., is 0·1 below that for the previous quarter and 0·7 below the standard for this quarter of the year.

Of the 21,136 births registered, 10,859 were of male children and 10,277 of female children. Those registered in July numbered 7,426,

* The standard adopted for comparative purposes is the average of the same number and rate for the corresponding quarters of the five preceding years.

in August 7,237, and in September 6,473, the equivalent monthly birth-rates being 17·8, 17·3 and 16·0 respectively.

Marriages.—The number of marriages registered, 10,252, is 2,076 above that for the previous quarter, the rate per 1,000 population, 8·3, being 1·6 above. The number for the present quarter is 823 more than the average, while the rate is 0·6 above the average.

The rate in the aggregate of large burghs is 10·3 compared with 5·8 for the rest of Scotland. In individual areas the rate in the large burghs ranged from 15·4 in Inverness, 13·3 in Perth, and 12·2 in Dumfries, to 5·4 in Dumbarton, 6·7 in Clydebank, and 6·7 in Greenock. In counties, exclusive of large burghs, it ranged from 8·0 in Roxburgh, 7·5 in Dumbarton, and 7·2 in West Lothian, to 2·5 in Sutherland, 2·6 in Ross and Cromarty, and 2·7 in Bute.

Marriages registered in July numbered 4,426, in August 2,503, and in September 3,323, the equivalent monthly marriage-rates being 10·6, 6·0 and 8·2 respectively.

Deaths.*—Deaths registered during the quarter numbered 13,094, and equalled a rate of 10·6 per 1,000 population. They are 2,027 less than were registered in the previous quarter, while the rate is 1·7 less. The number and the rate per 1,000 are 213 and 0·3 respectively below the standard for the present quarter.

The death-rate in the aggregate of large burghs is 10·6, which corresponds with that for the rest of Scotland. The rate in individual large burghs ranged from 13·2 in Arbroath, 12·6 in Inverness, and 12·1 in Airdrie, to 8·6 in Hamilton, 8·6 in Port-Glasgow, and 8·7 in Motherwell and Wishaw. In counties, exclusive of large burghs, it ranged from 15·5 in Sutherland, 14·8 in Bute, and 14·3 in Zetland, to 7·6 in Peebles, 8·2 in Kinross, and 9·0 in East Lothian.

Deaths registered in July numbered 4,542, in August 4,301, and in September 4,251, the equivalent monthly death-rates being 10·9, 10·3 and 10·5 respectively.

Infant Mortality.—Deaths of children aged under one year numbered 1,343 and are equivalent to an infantile mortality rate of 64 per 1,000 registered live births. These deaths are 361 fewer than in the previous quarter, and the rate is 9 less. Compared with the standard for the present quarter the rate is 1 more. This death-rate for the large burghs was 73, while for the rest of Scotland it was 52. In the large burghs individually it ranged from 155 in Dumfries, 122 in Airdrie, and 117 in Perth, to 23 in Dunfermline, 38 in Rutherglen, and 45 in Stirling. In counties, exclusive of large burghs, it ranged from 76 in Midlothian, 74 in Dumfries, and 73 in Lanark, to 0 in Kinross, 12 in Zetland, and 16 in Caithness.

* *Note.*—Where the place of death differs from the place of usual residence of the deceased, such death, for the purpose of these statistics, is allocated to the place of usual residence if in Scotland.

Causes of Death.—Principal Epidemic Diseases.—Of the 13,094 deaths registered during the quarter, 377 or 2·9 per cent. were attributed to the principal epidemic diseases. These deaths include 4 from measles, 51 from scarlet fever, 99 from whooping-cough, 74 from diphtheria, 39 from influenza, 36 from cerebro-spinal fever, and 74 others. Compared with the previous quarter the main feature in this group of diseases is a decrease in the entire group of 289 and in each of those specified, whooping-cough being 152 fewer, influenza 96 fewer, cerebro-spinal fever 20 fewer, measles 9 fewer, other epidemic diseases 9 fewer, diphtheria 2 fewer, and scarlet fever 1 fewer. The death-rate for the group is 30 per 100,000 compared with an average of 37 for the third quarter. In the large burghs the highest rates were found in Airdrie (1·3 per 1,000), in Arbroath (1·1), and in Greenock (0·6), while in counties, exclusive of large burghs, the highest were in Sutherland (1·5), in Wigtown (0·9), and in Banff (0·6).

Tuberculosis.—Deaths from all forms of tuberculosis, 822, account for 6·3 per cent. of all deaths, and are 221 fewer than in the previous quarter. Of them 596 were ascribed to tuberculosis of the respiratory system, a decrease of 172 compared with the previous quarter, 90 to tuberculosis of the central nervous system, a decrease of 17, 44 to abdominal tuberculosis, a decrease of 13, and 92 to other forms of tubercle, a decrease of 19. The quarterly death-rate from all forms of tuberculosis is 66 per 100,000 compared with an average of 78 for this quarter, that from respiratory tuberculosis being 48 compared with the average of 55.

Malignant Disease.—Deaths from this cause numbered 1,865, account for 14·2 per cent. of the total deaths, and equal a rate of 151 per 100,000. These deaths are 3 more than in the previous quarter, while the rate is 3 above the average.

Respiratory Diseases.—Deaths from the principal diseases of the respiratory system, pneumonia and bronchitis, accounted for 634 and 330 deaths respectively, and show a decrease in numbers compared with the previous quarter, pneumonia being 331 fewer and bronchitis 249 fewer. Pneumonia was responsible for 4·8 per cent. of the total deaths and bronchitis for 2·5 per cent. Corresponding death-rates per 100,000 population are 51 and 27 respectively. The standard rates for the present quarter are 59 and 36 respectively.

Pregnancy and Childbirth.—Deaths of mothers from diseases and accidents of pregnancy and childbirth numbered 103 and are equal to a rate of 487 per 100,000 births. This rate is 115 below the standard for the present quarter.

Violence.—Deaths from violence numbered 823, account for 6·3 per cent. of all deaths, and are equivalent to a rate of 66 per 100,000. These deaths are 100 more than in the previous quarter. Of the total deaths assigned to this group 225 were attributed to accidents with motor vehicles, which is 64 more than were recorded in the previous quarter. The death-rate from violence is 6 above the standard for this period.

For comparative purposes the accompanying table is given showing the death-rates from several important causes in the present quarter, and the average rate for the same quarter of the previous five years. Compared with the average rates for this season of the year mortality from all, and from individual causes, with the exception of scarlet fever, malignant disease, and violence wherein slight increases were evident, has been more favourable.

CAUSES OF DEATH.	Death-rates per 100,000 population.

REPORT

THIS Report deals more particularly with the statistics of the fourth quarter of the year 1933, but as figures relative to the entire year are now available, a short preliminary statement of them is included. A full report of the vital statistics of the year will in due course be published in the Seventy-ninth Annual Report. The annual figures here given may be accepted as substantially correct, but they are provisional, and will be superseded by those appearing in the Annual Report referred to above.

The chief features of the vital statistics of the year under review are a birth-rate which is the lowest on record, a marriage-rate which is the highest since 1923, a death-rate which is slightly below the average of recent years, and an infantile mortality-rate which is the lowest since 1923.

Births registered during the year numbered 86,546, the rate per 1,000 population being 17·6. They are 4,454 fewer than were registered in the previous year, and 6,948 fewer than the mean annual number registered during the preceding five years. The birth-rate is 1·0 below that recorded for the previous year, and 1·7 below the average for the previous five years. Of the total births registered, 5,964 or 6·9 per cent. were illegitimate. Both the number and rate are lower than the average of recent years.

Marriages registered during the year numbered 34,215, the equivalent annual marriage-rate being 7·0 per 1,000 population. They number 1,037 more than were recorded in the previous year, and 1,203 more than the average of the previous five years. The rate is slightly above the average of recent years.

Deaths from all causes numbered 64,848, and equalled a rate of 13·2 per 1,000 population. They are 1,197 less than those for the previous year, and 1,301 below the average. The rate is slightly lower than that for the previous year and slightly below the average.

Of the 64,848 deaths, 7,019 were of infants under one year. The infantile mortality-rate, 81 per 1,000 births, is 5 below that for the previous year and 4 below the average.

Mortality from the group of epidemic diseases was, on the whole, more favourable than in the previous year, but about equal to the average of recent years. For individual diseases the rates from influenza and scarlet fever were both higher, but from the other principal epidemic diseases were lower than the average, the rate ascribed to measles

showing the greatest improvement. Influenza, markedly above the average during the first quarter of the year, was below normal during the remaining quarters. Scarlet fever was somewhat above the average during the first three quarters of the year, and more markedly so during the last quarter. The rate from measles was abnormally low during each quarter, while that from whooping-cough, although slightly above the average during the first quarter, was consistently below it during the remainder of the year. Mortality from diphtheria, which was well below the average during the first quarter, was not greatly different from it during the rest of the year. Cerebro-spinal fever differed little from the average throughout the year.

The death-rate from all forms of tuberculosis, 80 per 100,000, is 4 below that for the previous year and 10 below the average. The improvement was consistent throughout the year.

Deaths from malignant disease numbered 7,518 and equalled a death-rate of 153 per 100,000. They number 60 more than in the previous year and represent the highest number so far recorded. The death-rate is the same as that for 1932, but is 6 above the average.

The deaths attributed to the chief respiratory diseases, bronchitis and pneumonia, numbered 3,289 and 4,599 respectively, the corresponding rates being 67 and 94 per 100,000. The death-rate in each case is lower than the average of the previous five years.

Deaths of mothers from diseases and accidents of pregnancy and childbirth numbered 513, and correspond to a mortality-rate of 5.9 per 1,000 births. This rate is 0.4 below that for the previous year and 0.7 below the average for the previous five years.

Deaths attributed to violent causes numbered 2,834, and correspond to a rate of 58 per 100,000. The number is 23 more than in the previous year, but the rate is the same. Deaths from accidents with motor vehicles show a slight increase compared with those for the previous year, having risen from 648 in 1932 to 662 in 1933.

A general summary of the causes of death in 1933, with corresponding age distribution, is given in Table IIA. Compared with the figures for the previous year increases are observed in the numbers assigned to scarlet fever, whooping-cough, influenza, malignant disease, diabetes, cerebral hæmorrhage and heart disease, but decreases from measles, diphtheria, tuberculosis, respiratory diseases and puerperal conditions.

The deaths in the several age periods of life compared with those for the previous year show decrease in numbers at each period up to age 25, with the exception of the group 10-14 years, and increases at ages over 25 years except in the periods 35-44 and 85 years and over, wherein the numbers were practically the same as in 1932.

REPORT OF THE BIRTHS, DEATHS, AND MARRIAGES REGISTERED
IN SCOTLAND DURING THE QUARTER ENDING 31ST DECEMBER 1933.

The four main Tables comprised in the Return may be summarised as follows :—

Table I shows for the counties and the large burghs of Scotland the number of births (with distinction as to legitimacy), marriages and deaths (those from the principal epidemic diseases and of infants under one year being shown separately), together with the corresponding rates per 1,000 population.

Table II shows for Scotland the numbers and rates per 1,000 population of births, marriages and deaths for each quarter and for the whole year in each of the last ten years. Illegitimate births and deaths under one year are shown separately.

Table III shows in detail the causes of death according to the Detailed International List (adapted) in certain age groups and by sex in Scotland.

Table IV shows in Short List form the causes of death and, for all causes, the ages at death in the counties and large burghs of Scotland.

Births.—The 20,415 births in the present quarter are 721 less than in the preceding quarter, the rate per 1,000 population, 16·5, being 0·6 below that recorded for the previous quarter. Compared with the standard* the number of births and the rate per 1,000 population in the present quarter are 1,988 and 1·8 respectively below that average.

The birth-rate in the aggregate of large burghs, 16·8, is higher than in the rest of Scotland (16·1). In individual areas the rates ranged in burghs from 24·4 in Hamilton, 20·7 in Coatbridge, 18·0 in Glasgow, and 18·0 in Motherwell and Wishaw, to 13·0 in Perth, 13·6 in Arbroath, and 13·8 in Kirkcaldy. In counties, exclusive of large burghs, it ranged from 23·2 in Nairn, 20·4 in Wigtown, and 19·0 in Banff, to 8·7 in Bute, 10·3 in Selkirk, and 11·1 in Peebles.

The proportion of illegitimate births, 6·8 per cent., is 0·1 below that for the previous quarter and 0·2 below the standard for this quarter of the year.

Of the 20,415 births registered, 10,730 were of male children and 9,685 of female children. Those registered in October numbered 6,728, in November 6,566, and in December 7,121, the equivalent monthly birth-rates being 16·1, 16·3 and 17·1 respectively.

Marriages.—The number of marriages registered, 8,723, is 1,529 below that for the previous quarter, the rate per 1,000 population, 6·8, being 1·5 below. The number for the present quarter is 441 more than the average, while the rate is the same as the average.

* The standard adopted for comparative purposes is the average of the same number and rate for the corresponding quarters of the five preceding years.

The rate in the aggregate of large burghs is 7·8 compared with 6·1 for the rest of Scotland. In individual areas the rate in the large burghs ranged from 15·6 in Inverness, 11·5 in Perth, and 10·2 in Dumfries, to 4·7 in Dumbarton, 4·9 in Coatbridge, and 5·6 in Paisley. In counties, exclusive of large burghs, it ranged from 9·0 in Bute, 8·8 in Wigtown, 8·2 in Banff, and 8·2 in Kinross, to 3·2 in Inverness, 3·8 in Sutherland, and 4·3 in Ross and Cromarty.

Marriages registered in October numbered 2,912, in November 2,128, and in December 3,683, the equivalent monthly marriage-rates being 7·0, 5·3 and 8·8 respectively.

Deaths.*—Deaths registered during the quarter numbered 15,883 and equalled a rate of 12·8 per 1,000 population. They are 2,789 more than were registered in the previous quarter, while the rate is 2·2 more. The number and the rate per 1,000 are 105 and 0·3 respectively above the standard for the present quarter.

The death-rate in the aggregate of large burghs is 13·1 compared with 12·5 for the rest of Scotland. The rate in individual large burghs ranged from 17·1 in Inverness, 14·8 in Ayr, and 14·4 in Perth, to 10·0 in Airdrie, 10·7 in Clydebank, and 11·2 in Kilmarnock. In counties, exclusive of large burghs, it ranged from 19·2 in Kinross, 18·2 in Zetland, and 16·9 in Bute, to 9·7 in West Lothian, 10·5 in East Lothian, and 10·8 in Aberdeen.

Deaths registered in October numbered 4,795, in November 5,194, and in December 5,894, the equivalent monthly death-rates being 11·5, 12·9 and 14·1 respectively.

Infant Mortality.—Deaths of children aged under one year numbered 1,612 and are equivalent to an infantile mortality rate of 79 per 1,000 registered live births. These deaths are 269 more than in the previous quarter, and the rate is 15 more. Compared with the standard for the present quarter the rate is 5 less.

This death-rate for the large burghs was 89, while for the rest of Scotland it was 66. In the large burghs individually it ranged from 133 in Dumfries, 131 in Ayr, and 106 in Greenock, to 32 in Inverness, 47 in Dunfermline, and 55 in Clydebank. In counties, exclusive of large burghs, it ranged from 135 in Clackmannan, 112 in Wigtown, and 102 in Selkirk, to 0 in Peebles, 22 in Ross and Cromarty, and 28 in Bute.

Causes of Death.—*Principal Epidemic Diseases.*—Of the 15,883 deaths registered during the quarter, 598, or 3·8 per cent., were attributed to the principal epidemic diseases. These deaths include 2 from measles, 122 from scarlet fever, 56 from whooping-cough, 117 from diphtheria, 164 from influenza, 33 from cerebro-spinal fever, and 104

* *Note.*—Where the place of death differs from the place of usual residence of the deceased, such death, for the purpose of these statistics, is allocated to the place of usual residence if in Scotland.

others. Compared with the previous quarter the main feature in this group of diseases is an increase of 125 in those attributed to influenza, of 71 to scarlet fever, of 43 to diphtheria, and of 30 to other epidemic diseases, while deaths attributed to measles are 2 fewer, to cerebro-spinal fever 3 fewer, and to whooping-cough 43 fewer.

Tuberculosis.—Deaths from all forms of tuberculosis, 870, account for 5.5 per cent. of all deaths, and are 48 more than in the previous quarter. Of them 669 were ascribed to tuberculosis of the respiratory system, an increase of 73 compared with the previous quarter, 63 to tuberculosis of the central nervous system, a decrease of 27, 43 to abdominal tuberculosis, a decrease of 1, and 95 to other forms of tubercle, an increase of 3. The quarterly death-rate from all forms of tuberculosis is 70 per 100,000 compared with an average of 80 for this quarter, that from respiratory tuberculosis being 54 compared with an average of 59.

Malignant Disease.—Deaths from this cause numbered 1,982, account for 12.5 per cent. of the total deaths, and equal a rate of 160 per 100,000. These deaths are 117 more than in the previous quarter, while the rate is 11 above the average.

Respiratory Diseases.—Deaths from the principal diseases of the respiratory system, pneumonia and bronchitis, accounted for 1,096 and 785 respectively and show an increase in numbers compared with the previous quarter, pneumonia being 462 more and bronchitis 455 more. Pneumonia was responsible for 6.9 per cent. of the total deaths and bronchitis for 4.9 per cent. Corresponding death-rates per 100,000 population are 88 and 63 respectively. The standard rates for the present quarter are 108 and 71 respectively.

Pregnancy and Childbirth.—Deaths of mothers from diseases and accidents of pregnancy and childbirth numbered 141 and are equal to a rate of 691 per 100,000 births. This rate is 17 below the standard for the present quarter.

Violence.—Deaths from violence numbered 657, account for 4.1 per cent. of all deaths, and are equivalent to a rate of 53 per 100,000. These deaths are 166 fewer than in the previous quarter. Of the total deaths assigned to this group 166 were attributed to accidents with motor vehicles, which is 59 fewer than were recorded in the previous quarter. The death-rate from violence is 6 below the standard for this period.

For comparative purposes the accompanying table is given showing the death-rates from several important causes in the present quarter, and the average rate for the same quarter of the previous five years. Compared with the average, mortality in the period under review from all and from the individual causes specified has, on the whole, been more favourable, the only exceptions being in the case of scarlet fever, which is markedly above average, and of malignant disease, deaths from which continue to increase.
